PROFESSIONAL SUMMARY

Full-stack Software Engineer and Computer Science honors graduate (GPA: 3.80) with hands-on experience building and deploying production-ready web applications, RESTful APIs, and database-driven systems end-to-end. Proficient in Java and Python on the backend, React and Angular on the frontend, and MySQL for data management. Experienced integrating AI/LLM APIs, building ETL pipelines, and writing secure, modular, testable code. Daily user of Claude Code, Cursor, and GitHub Copilot. Passionate about solving real business problems through technology and delivering software that creates measurable impact. Award winner at UNT Senior Design Research & Design Day & CSE Awards Ceremony 2026. Available full-time from June 25, 2026. Open to relocation anywhere in the United States.

EDUCATION

University of North Texas

Denton, TX

Bachelor of Science in Computer Science, Honors Program | GPA: 3.80 / 4.0

May 2026

- **Award Winner** — UNT Senior Design Research & Design Day & CSE Awards Ceremony 2026 (Alumni Networking Tool)
- UNT Transfer Excellence Award

Dallas College

Dallas, TX

Coursework in Computer Science (transferred to UNT)

2022 – 2024

Youngstown State University

Youngstown, OH

Bachelor of Science in Computer Science (transferred)

August 2022 – December 2022

- YSU Honors Scholar Award | YSU International Scholar Award

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), TypeScript (familiar), C++, C, SQL, HTML5/CSS3, Bash/Shell, Go/Golang (learning)

Frontend: React, Angular, Next.js (familiar), HTML5, CSS3, JavaScript, TypeScript, Leaflet.js, responsive design, component-based architecture

Backend: Java, Python (Flask), Node.js, Express.js, REST API design & integration, microservices, OAuth 2.0, ETL pipelines, JDBC, state machine design

Databases: MySQL, SQL (DDL/DML/joins/indexing/query optimization), relational schema design, SQLite, PostgreSQL (familiar), NoSQL (familiar)

AI & Tools: Claude Code (daily), Cursor (daily), GitHub Copilot (proficient), Groq AI / LLaMA 3.1 integration, agentic workflows, MCP servers, prompt engineering

Cloud & DevOps: AWS (S3, Lambda, DynamoDB familiar), Docker (familiar), Kubernetes (familiar), Git, GitHub, CI/CD pipelines, Unix/Linux, Agile/Scrum

Security: AES-256 Encryption, parameterized SQL, secure coding, Google Cybersecurity certified, SailPoint IIQ/ISC certified

PROFESSIONAL EXPERIENCE

Web Developer & SEO Analyst

Remote

Technology Spot

June 2020 – May 2022

- Developed and optimized 50+ web pages applying front-end best practices and data-driven strategies, driving a 40% increase in organic traffic and 15,000+ monthly visits.
- Used Google Analytics to identify performance gaps and iterate on page structure, moving 20+ keywords into top-10 search rankings.
- Delivered technical and performance reports to stakeholders, translating web metrics into actionable development priorities.

Student Assistant

Youngstown, OH

Youngstown State University

August 2022 – December 2022

- Supported 10+ students with individualized academic assistance, improving assignment completion by 30% through structured Excel-based progress tracking.

TECHNICAL PROJECTS

- UNT Alumni Networking Tool (Capstone)** | *Python, Flask, React, MySQL, Groq AI, LLaMA 3.1* 2025 – 2026
- Built full-stack alumni analytics platform for UNT Dean’s Office as senior capstone project — Python/Flask backend, React/JavaScript frontend, MySQL database, and Groq AI (LLaMA 3.1) integration for automated data extraction; 97+ Git commits in Agile/Scrum team of 5.
 - Engineered ETL pipeline with OAuth authentication and O(1) hash map deduplication reducing data inconsistencies by 85% across 1,000+ records; achieved 50% faster performance through SQL query optimization.
 - **Award Winner:** UNT Senior Design Research & Design Day & CSE Awards Ceremony 2026 — judged best project among all CS senior teams.
- Secure Payment Processing Backend** | *Java, AES-256 Encryption, JDBC, MySQL* 2025
- Designed and built a Java backend processing 500+ test transactions with AES-256 encryption, parameterized SQL (injection prevention), and a state machine for transaction validation.
 - Implemented comprehensive edge-case handling for duplicate transactions, insufficient funds, and timeouts — production-grade reliability patterns with full unit and regression test coverage.
- Inventory Management System** | *Java, MySQL, JDBC, Swing GUI* 2025
- Built a full-featured Java application with MySQL database supporting 1,000+ SKUs with CRUD operations, transaction logging, and role-based access control.
 - Optimized data retrieval using Hash Maps and BSTs achieving O(log n) search, improving query speed by 60%; designed normalized schema with foreign key constraints for data integrity.
- Unix System Monitoring Tool** | *Python, Bash, Unix* 2024
- Built automated Python and Bash scripts to monitor system health (CPU, memory, disk, uptime) with cron-scheduled execution and structured JSON/text report generation.
- City Growth Simulation Engine** | *C++, OOP, STL* 2023
- Developed an agent-based simulation on a 100x100 grid using cellular automata and BFS; designed 12+ modular classes following SOLID principles with spatial partitioning for 60 FPS rendering.

CERTIFICATIONS & HONORS

Certifications: Google Cybersecurity Professional Certificate (Coursera, Feb 2026) | Node.js Essential Training (LinkedIn, Feb 2026) | SQL Essential Training (LinkedIn) | Programming Foundations: Databases (LinkedIn, Jan 2026)

Honors: **Senior Design Award Winner** — UNT CSE Awards Ceremony 2026 | UNT Transfer Excellence Award | YSU Honors Scholar Award | YSU International Scholar Award | Certified in Leadership & Teamwork (Tressel Institute)

ADDITIONAL

Availability: Full-time from May 2026. Open to relocation anywhere in the United States.
